PROBLEM STATEMENT:

“The increasing use of smartphones and digital applications has led to changes in people’s daily screen time, gaming, social media usage, sleep patterns, and overall digital well-being. However, it is difficult to understand how these factors are related to digital addiction and user behavior. Therefore, there is a need to analyze user data and develop an interactive dashboard that identifies patterns in screen time, addiction levels, sleep, stress, app usage, and other digital habits. This analysis can help understand digital usage behavior and provide meaningful insights into digital well-being.”

I AM	A SMART PHONE USER
I AM TRYING TO	TRACK AND UNDERSTAND MY DIGITAL USAGE
BUT	I CANNOT EASILY SEE HOW MUCH TIME I SPEND ON DIFFERENT ACTIVITIES
BECAUSE	MY SCREEN TIME, SOCIAL MEDIA, GAMING AND OTHER USAGE ARE SPREAD ACROSS DIFFERENT ACTIVITIES
WHICH MAKES ME FEEL	CONCERNED ABOUT MY DIGITAL HABITS

EXAMPLE :

Problem Statement	I am (user)	I’m trying to	But	Because	Which makes me feel
PS-1	Smartphone user	Track screen time	I use my phone too much	I use many apps	concerned
PS-2	Smartphone user	Reduce phone usage	It affects my daily routine	I spend too much time online	worried
