Project Initialization and Planning Phase

Team ID	MCA
Project Title	Smartphone Usage, Digital Addiction & Well-Being Analytics
Maximum Marks	3 Marks

Project Proposal (Proposed Solution)

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Smartphone Usage, Digital Addiction & Well-Being Analysis	
Objective	To analyze smartphone usage and digital addiction patterns and understand how usage affects users' daily life and well-being.
Scope	The project focuses on analyzing smartphone usage data, addiction levels, screen time, social media use, sleep, stress, and user demographics. It presents the findings through a Power BI dashboard.

Many people spend a large amount of time on smartphones. High screen time, frequent app use, social media use, notifications, and other usage habits may be linked with digital addiction and changes in sleep, stress, and academic or work activities.

Description	The analysis helps identify common usage patterns and factors related to digital addiction. These findings can help understand digital well-being and support better awareness of smartphone usage.
Impact	The dataset is cleaned and analyzed using MySQL and Power BI. SQL is used for data preparation and analysis. Power BI is used to create KPIs, charts, filters, and an interactive dashboard.

Key features include addiction analysis, screen-time analysis, age-group analysis, gender-wise analysis, stress and sleep analysis, social media usage analysis, and an interactive Power BI dashboard.

Approach	Outline the methodology and techniques to be used
Key Features	Highlight the unique aspects of the proposed solution

Resource Requirements

Resource Type	Description	Specification/Allocation
Used for data analysis, SQL, and Power BI		
Computing Resources	CPU	Standard laptop/desktop processor
Memory	RAM	Minimum 8 GB recommended
Storage	Disk space	Space required for dataset, Power BI file, and project files
MySQL, Power BI Desktop, Microsoft Excel		
Frameworks	Data analysis tools	Power BI for dashboard development
Libraries	Data analysis libraries	Not required for the main dashboard; SQL and Power BI are used
Development Environment	Tools used	MySQL Workbench, Power BI Desktop, Excel
Smartphone usage dataset, 7,500 users, CSV format		
Data	Source, size, format	e.g., Kaggle dataset, 10,000 images
